CORDA Research Symposium

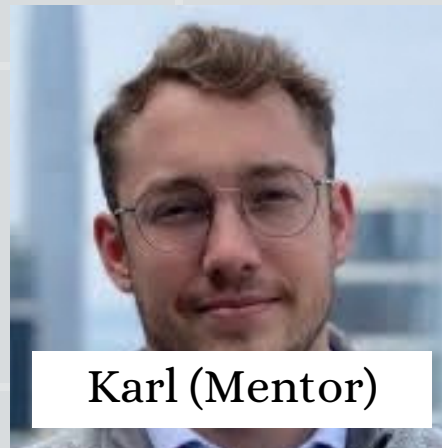

Bhanu_Project 12 Lightning Talk

WHAT DOES PUBLIC OVERSIGHT OF AI IN NATIONAL SECURITY TELL US?

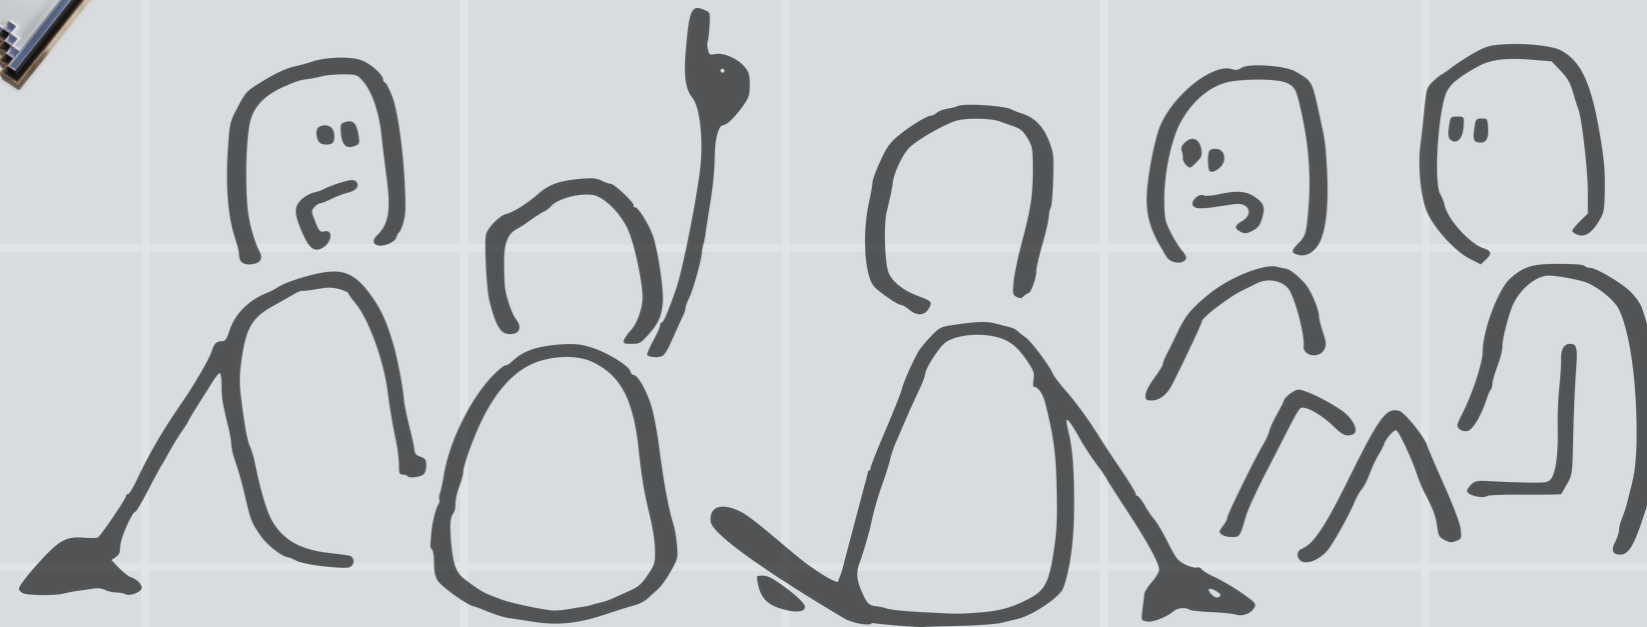

Bhanu (Mentee)

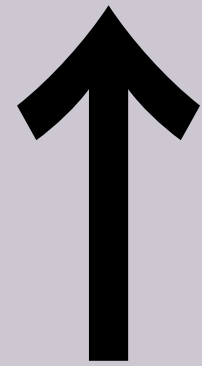

Karl (Mentor)

Abra (Policy)

AI OVERSIGHT IS LOSING SIGHT OF THE BIGGER PICTURE...

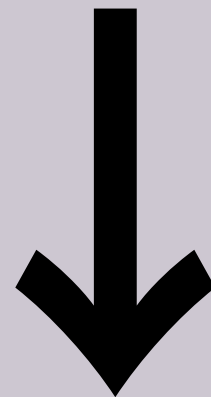

AI into the kill chain, surveillance, procurement.

Moving without brakes as the governing infrastructure required to hold elected representatives and frontier labs to account . . .
FRACTURES ----->

Oversight infrastructure under strain.

*Inspectors general ·
whistleblowers ·
classification ·
subpoenas.
(To name a few!)*

WHAT PROJECT 12 AIMS TO PUT BACK ON THE REGULATORY MAP.

In the process...

01. Opting out of a scoring system

Doing so has provoked difficult conversations about how we can most meaningfully contextualize the actions of a MoC, rather than a static verdict.

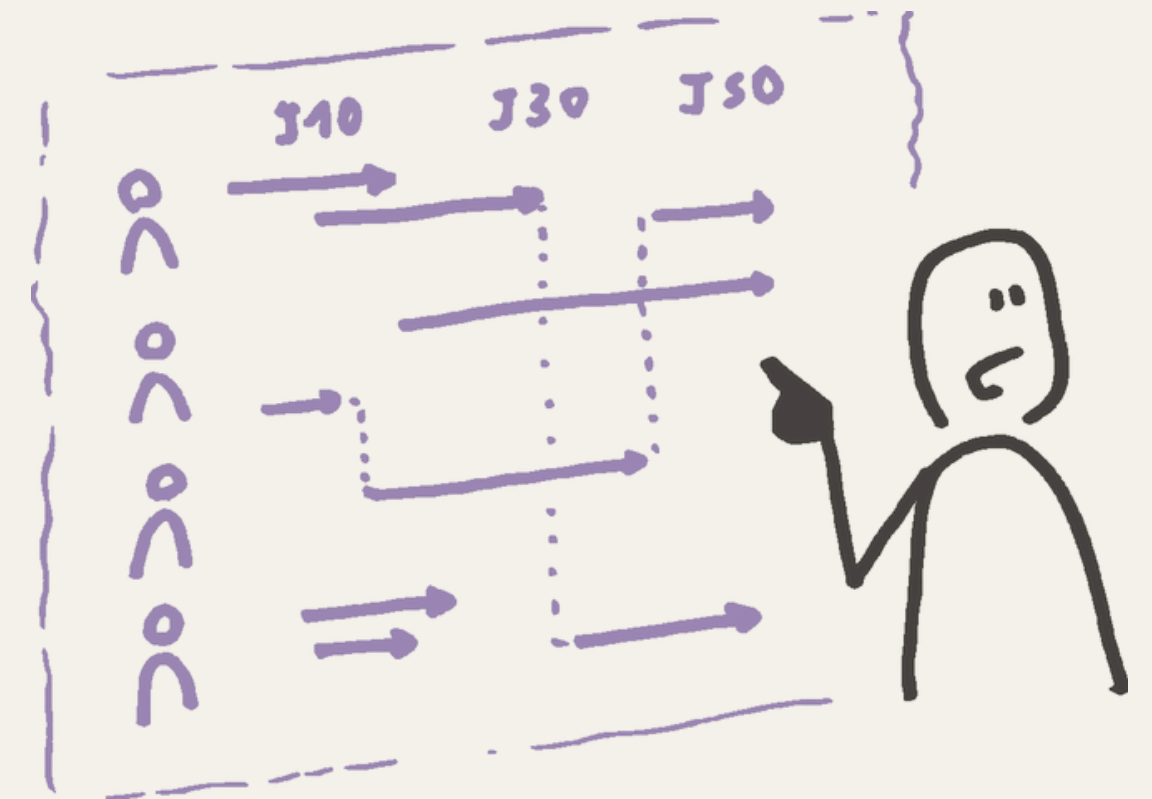

02. Underbelly of “public” records

Closed sessions, private letters, holds... OSINT distinctions between pro-oversight rhetoric and oversight action offered interesting conversations. Now, I’m experimenting with a qualitative study that serves as the tracker’s backbone, addressing these gaps.

WHERE THE TRACKER STANDS RIGHT NOW

- **NOW**
A full **seven-view design** and the methodology are working through external academic review. The tracker isn't live yet so we can fully validate the site with research partners &...
- **THE HARD PART**
Deciding which moments of oversight **actually count** meant being careful about bias. But now we can use this tracker to easily scale and structure a similarly-oriented CV tracker.
- **WHAT'S NEXT**
Toward the **full Congress**, a companion qualitative study (++ Tracker 2 & the **midterms!**)

Learning to build conversations & craft tools that provoke a more meaningful public deliberation of **national security and AI oversight**.

Get Involved with AIWI's trackers!

Keep in touch if you have interesting thoughts or ideas about how we can better democratize public deliberation of elected representatives and meaningful oversight action.
